Notes:					
LDC: Least Developed Country are based on United Nations classification (as of June 2011)					
Income Group: Economies are divided according to 2010 GNI per capita, calculated using the World Bank Atlas method. The groups are: low income, \$1,005 or less; lower middle income, \$1,006 - \$3,975; upper middle income, \$3,976 - \$12,275; and high income, \$12,276 or more.					
Lending category: IDA countries are those that had a per capita income in 2010 of less than \$1,175 and lack the financial ability to borrow from IBRD.					
IBRD loans are nonconcessional. Blend countries are eligible for IDA loans because of their low per capita incomes but are also eligible for IBRD loans because they are financially creditworthy.
