

Burundi - Strengthening Urban Resilience

Country

Burundi

ACP-EU Disaster Risk Management Program Component

Improve urban and peri-urban
resilience mechanisms in targeted
Central, Eastern and Western
African cities

Amount Approved

€440,000 / \$475,000

Duration

10/2023 – 10/2025

Context and Objectives

Risk-informed spatial planning and enforcement is not practiced in Bujumbura or in other urban areas of Burundi. In addition, the country does not have a comprehensive, up-to-date land mapping and registry system that consolidates information on land tenure, type of ownership, and the dynamism of the land and real estate market. This context hinders the government's ability to track, anticipate, and plan for urban expansion.

The objective of this project is to strengthen risk-informed urban development in Bujumbura city and within national and sub-national institutions in Burundi, enabling the development of green, resilient, and inclusive urban environments.

Main Activities and Expected Results

Support capacity building for risk-informed land-use and urban services planning and land administration processes in Bujumbura

This activity aims to support the government in terms of risk-informed land-use and urban services planning and land administration processes in Bujumbura. This is being achieved through a combination of capacity building and institutional strengthening in the field of land administration and management.

Expected Results:

- Enhanced use of risk-informed, gender-sensitive, and disability inclusive zoning and land use plans.
- Improved land administration processes and land delivery mechanisms in urban expansion areas.

Strengthen local financing to ensure resilient local infrastructure

This activity provides support to central and local governments' considering the evolving decentralization agenda, and the need to carry out increasing levels of responsibilities. Specifically, a financial analysis of the city of Bujumbura is identifying opportunities to promote resilient infrastructure.

Expected Result:

- An effective shift in institutional responsibilities supporting communes is the adoption of their additional obligations.

Partnerships and Coordination

The World Bank implements this project in close coordination with the Burundi Agency for Urban Planning and Housing; the Ministry of Infrastructure, Equipment, and Social Housing; the Foreign Affairs and
