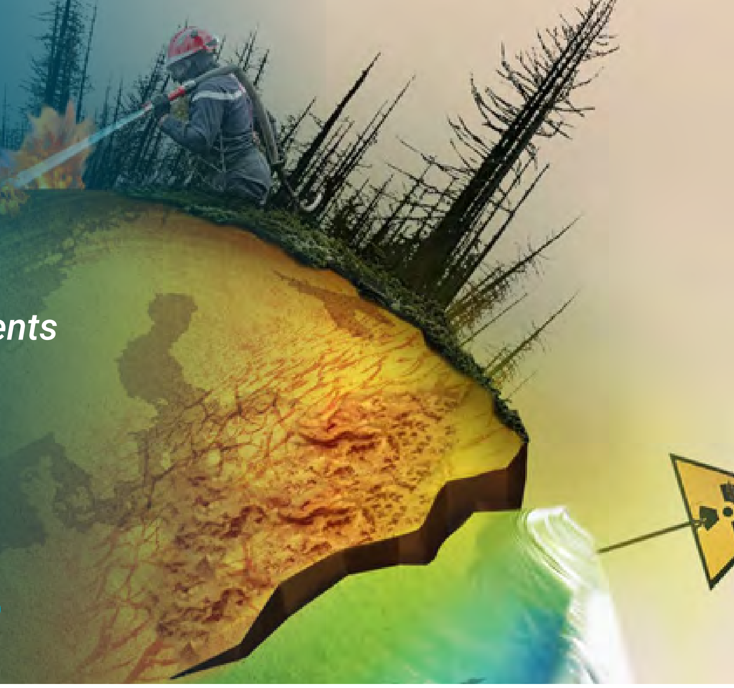
Economics for Disaster Prevention and Preparedness

Build the skills needed to make smarter investments for disaster and climate resilience



Now available on the ***RDRM Learning Hub***

ABOUT THIS COURSE

This course focuses on making smart, targeted investment decisions to strengthen disaster and climate resilience in the context of limited budgets and growing risks. It builds strategic planning and decision-making skills using data, tools, and practical approaches that support resilient development.

WHAT YOU'LL LEARN

- Learn how to assess, prioritize, and cost investments in disaster and climate resilience
- Apply established methodologies such as the Triple Dividend of Resilience, Ready2Response, and multi-criteria assessments
- Explore real-world case studies from Bulgaria, Croatia, Portugal, Romania, and Sweden
- Understand how these approaches can be applied across sectors, administrative levels, and multiple hazards.

HOW THE COURSE WORKS

Self-paced, online learning

Short, bite-sized modules

Practical tools and case studies

Free certificate upon completion

WHO SHOULD TAKE THIS COURSE

Development practitioners, policymakers, economists, and professionals involved in disaster risk management, climate resilience, and investment planning.
