

5-10-50

UNDP's Commitment to Risk-Informed Development

**Bureau for Policy and Programme Support
Berlin, October 2015**

VIDEO

THE OVERVIEW

5 - 10 - 50

5 Priority Areas...
Over 10 Years...
in 50 Targeted Countries...

The Vision

A comprehensive programme that:

- Delivers on risk-informed development in support of the Sendai Framework
- Links directly to the Sustainable Development Goals
- Implements the disaster/climate resilience pillar of UNDP's Strategic Plan
- Is founded in a broad partnership approach
- Builds on UNDP's comparative advantage

Advances have been made...

- DRR increasingly seen as a development issue
- Paradigm shift from preparedness to comprehensive disaster risk reduction (DRR)
- Reduced mortality in most countries through preparedness and early-warning
- Institutional and policy frameworks to manage disaster and climate risks in place, but...
- Risk progressively recognized in other global policy processes

... But a Step Change is Needed

- Economic losses (and sometimes mortality) are still on the rise
- Majority of public & private investment decisions not informed by risk assessments
- DRR is still largely seen as a technical rather than a governance issue
- Flawed & unsustainable development process continues to contribute disaster/climate risks
- Climate change adds further pressures on development

THE PROGRAMME

5-10-50 will deliver...

- Sustained support to countries to gradually ‘achieve’ risk informed development
- Contextually relevant and needs based assistance
- Tailor-made support ranging from traditional DRR to complex public policy advice
- A whole-of-society approach to DRR
- Cohesion and integration across climate change, environment and energy with links to other UNDP focus areas

5 Thematic Areas

The diagram consists of five horizontal blue bars, each containing a white circle on the left and a white text label. The bars are connected by a vertical line on the left side, which has a small blue dot at the top and bottom. The text labels are: RISK ASSESSMENT & COMMUNICATION, EARLY WARNING & PREPAREDNESS, INCLUSIVE RISK GOVERNANCE, RESILIENT RECOVERY, and URBAN & LOCAL LEVEL RISK MANAGEMENT.

RISK ASSESSMENT & COMMUNICATION

EARLY WARNING & PREPAREDNESS

INCLUSIVE RISK GOVERNANCE

RESILIENT RECOVERY

URBAN & LOCAL LEVEL RISK MANAGEMENT

Linkages with Sendai

| 5-10-50 Thematic Areas | Sendai Framework Priorities |
|-------------------------------------|-----------------------------------|
| Risk assessment & communication | P1: Understanding risk |
| Early warning & preparedness | P4: Recovery & preparedness |
| Resilient recovery | P4: Recovery & preparedness |
| Inclusive risk governance | P2: Strengthening risk governance |
| Urban & local level risk management | P3: DRR for resilience |
| | |

The 5 Themes Unpacked

- Risk Assessment & Communication:
 - Disaster & climate risk assessments
 - Application of risk assessments in DRR, CCA and development
 - Damage and loss accounting systems
 - Regional risk profiling
- Early Warning & Preparedness:
 - National & local EWS connected to communities
 - Communication networks
 - Institutional & coordination support
 - Access to climate information
 - Preparedness planning
- Risk Governance:
 - Risk-informed planning & budgeting
 - Inclusive/adaptive risk governance institutions
 - Policy and legal frameworks to set incentives
 - Focus on decision-making processes and political economy

The 5 Themes Unpacked-II

- Resilient Recovery:
 - Post-disaster damage, loss and needs assessment & planning
 - Recovery preparedness through policies & institutional frameworks
 - Financing mechanisms for recovery
 - Tools & guidelines
- Urban and Local Risk Management:
 - Risk-informed urban development
 - Urban & local risk management/governance
 - Local government - community interface
 - Decentralized DRR & CCA

Cross-cutting Issues

Engagement Principles

| Principle | Potential Indicator (s) |
|---|---|
| Natural Hazard Risk: (Population in areas of a natural hazard) | <ul style="list-style-type: none">• World Risk Index (UNU-EHS)• Natural Disaster Hotspots (50%+ population exposed)• Natural Hazards Risk Atlas (Maplecroft)• INFORM |
| Vulnerability: (Susceptibility to impact of disasters) | <ul style="list-style-type: none">• Income Status (World Bank)• Human Development Indicators (ranked below 50 in country index) |
| Disaster History: (Impact of past disasters) | <ul style="list-style-type: none">• Em-Dat (repeatedly affected population, % and volume population affected)• Munich Re (repeated financial losses, volume economic losses, %GDP losses) |
| Enabling Environment: (Commitment of governments for DRR) | <ul style="list-style-type: none">• Government support for DRR, through ILS and other processes (qualitative assessment)• Specific requests for disaster/climate risk related support• UNDP and Partners Working Relationships (qualitative assessment) |

Where are we at?

Programme Development

- Principles of Country Selection
- Management Arrangements
- Integration with Climate Change Adaptation & Conflict Prevention
- Country Baselines

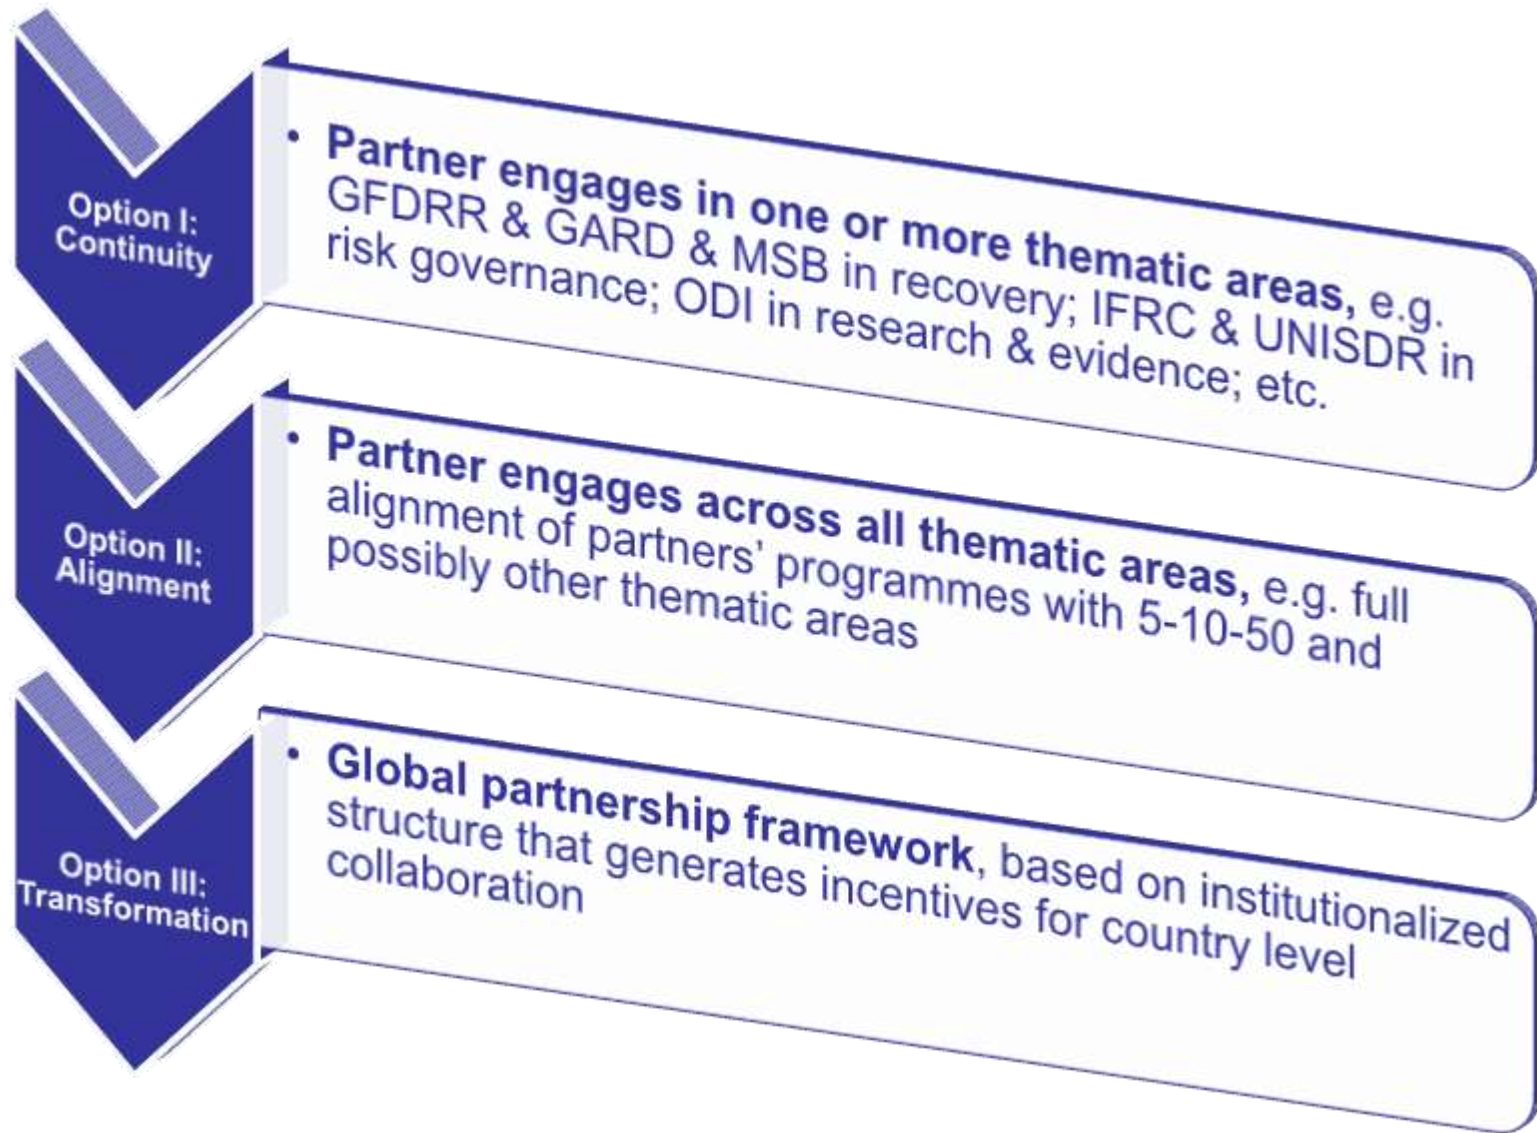

External Engagement

- Member State Meetings and Capital Visits
- Formalizing Partnerships
- Identifying South-South Cooperation

February 2016 Launch (proposed)

Partnership Scenarios

WHY UNDP?

UNDP's DRR Delivery 2005-2014

EXPENDITURE IN \$ MILLION PER REGION PER YEAR, 2005-2014

10
YEARS

163
COUNTRIES

\$1.7
BILLION

The Yearly Trends

DRR becomes a global priority:

■ Asia and the Pacific
■ Rest of the World

UNDP'S DRR EXPENDITURE IN 2014:

\$195 million

THIRD HIGHEST ON RECORD

Excluding Asia and the Pacific, total annual expenditure has increased by more than a factor of four since 2005.

Africa increasing: Annual expenditures of \$50 million in each of the last three years. In 2014, this accounted for 26% of global expenditure.

10-years in support of the HFA

Understanding & Communicating Risk

RESILIENT RECOVERY
HAS BEEN UNDERTAKEN IN

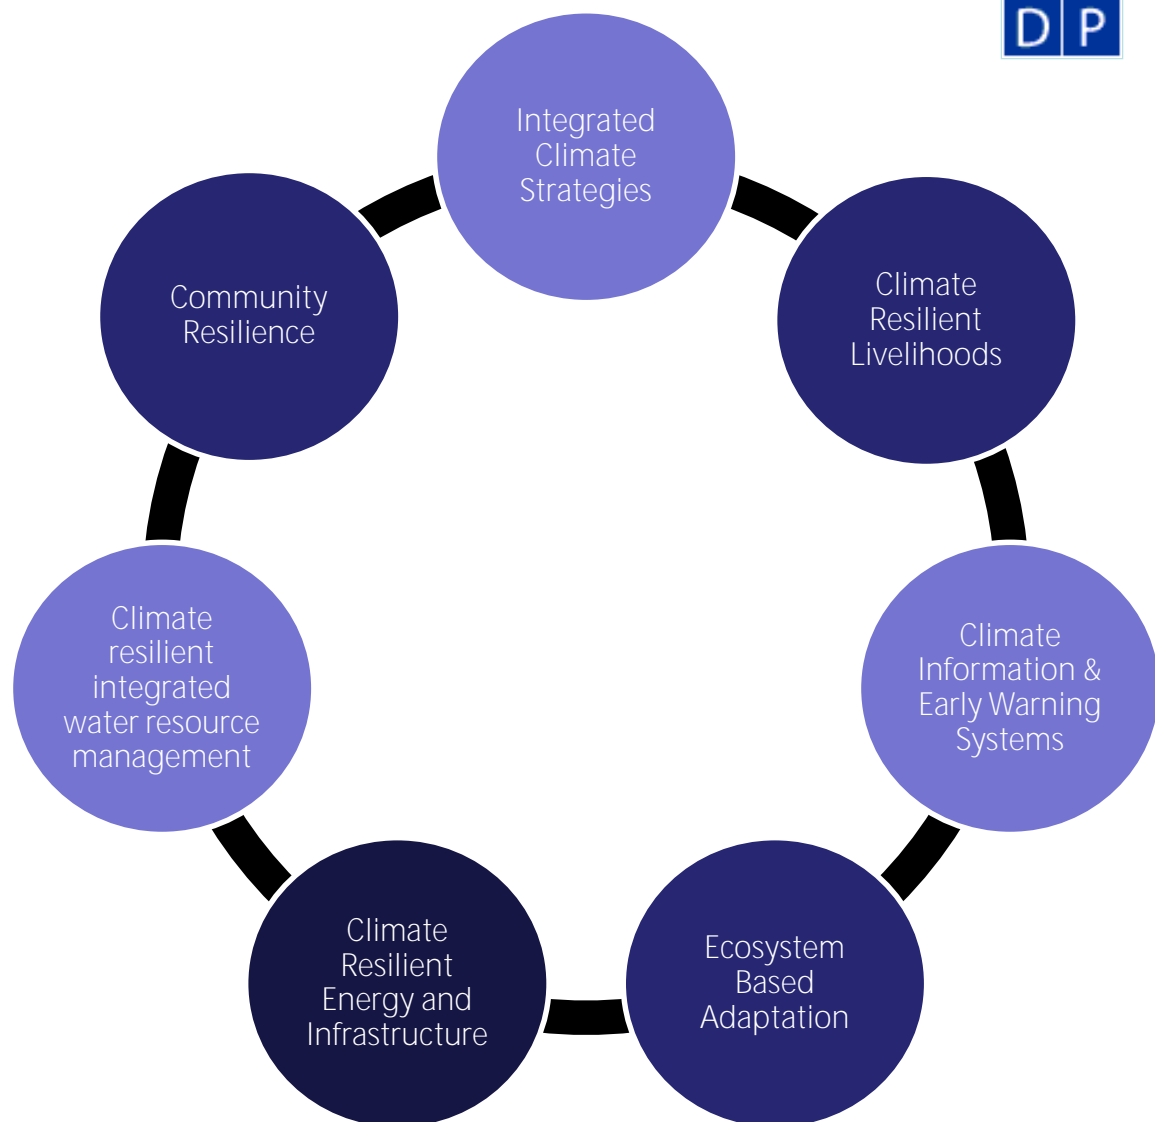

112
COUNTRIES

A Focus on Adaptation

UNDP: largest UN Agency supporting climate adaptation programming

- USD 750 million portfolio
- Leveraged more than \$2b in co-financing
- 110 countries supported

Our Strengths

A Unified Team: A combined and strengthened Climate Change, Disaster Risk Reduction and Sustainable Energy Team

Technical Support: Increased expertise and presence at regional levels, better able to support national partners

Integrated: Leveraging related areas: governance, climate change, environment, fragility, livelihoods, gender, poverty

Coordination and Coherence: Global/Regional convening, oversight of the UN Resident Coordinator/Country Teams

Country Level Strength: Presence in 177 countries and decades of sustained engagement with national partners

In summary: 5-10-50 offers...

- Comprehensive package of technical assistance delivered jointly with key partners
- Services to meet a range of country needs from regular DRR to transformative risk-informed development
- A healthy balance between direct programme support and policy and research support for change
- The full strength of UNDP's work across a variety of integrated programme areas
- A streamlined approach to DRR, climate adaptation and sustainable development

Comprehensive, Long-Term, Sustained

Thank You!
