Promoting safer building and supporting self- recovery

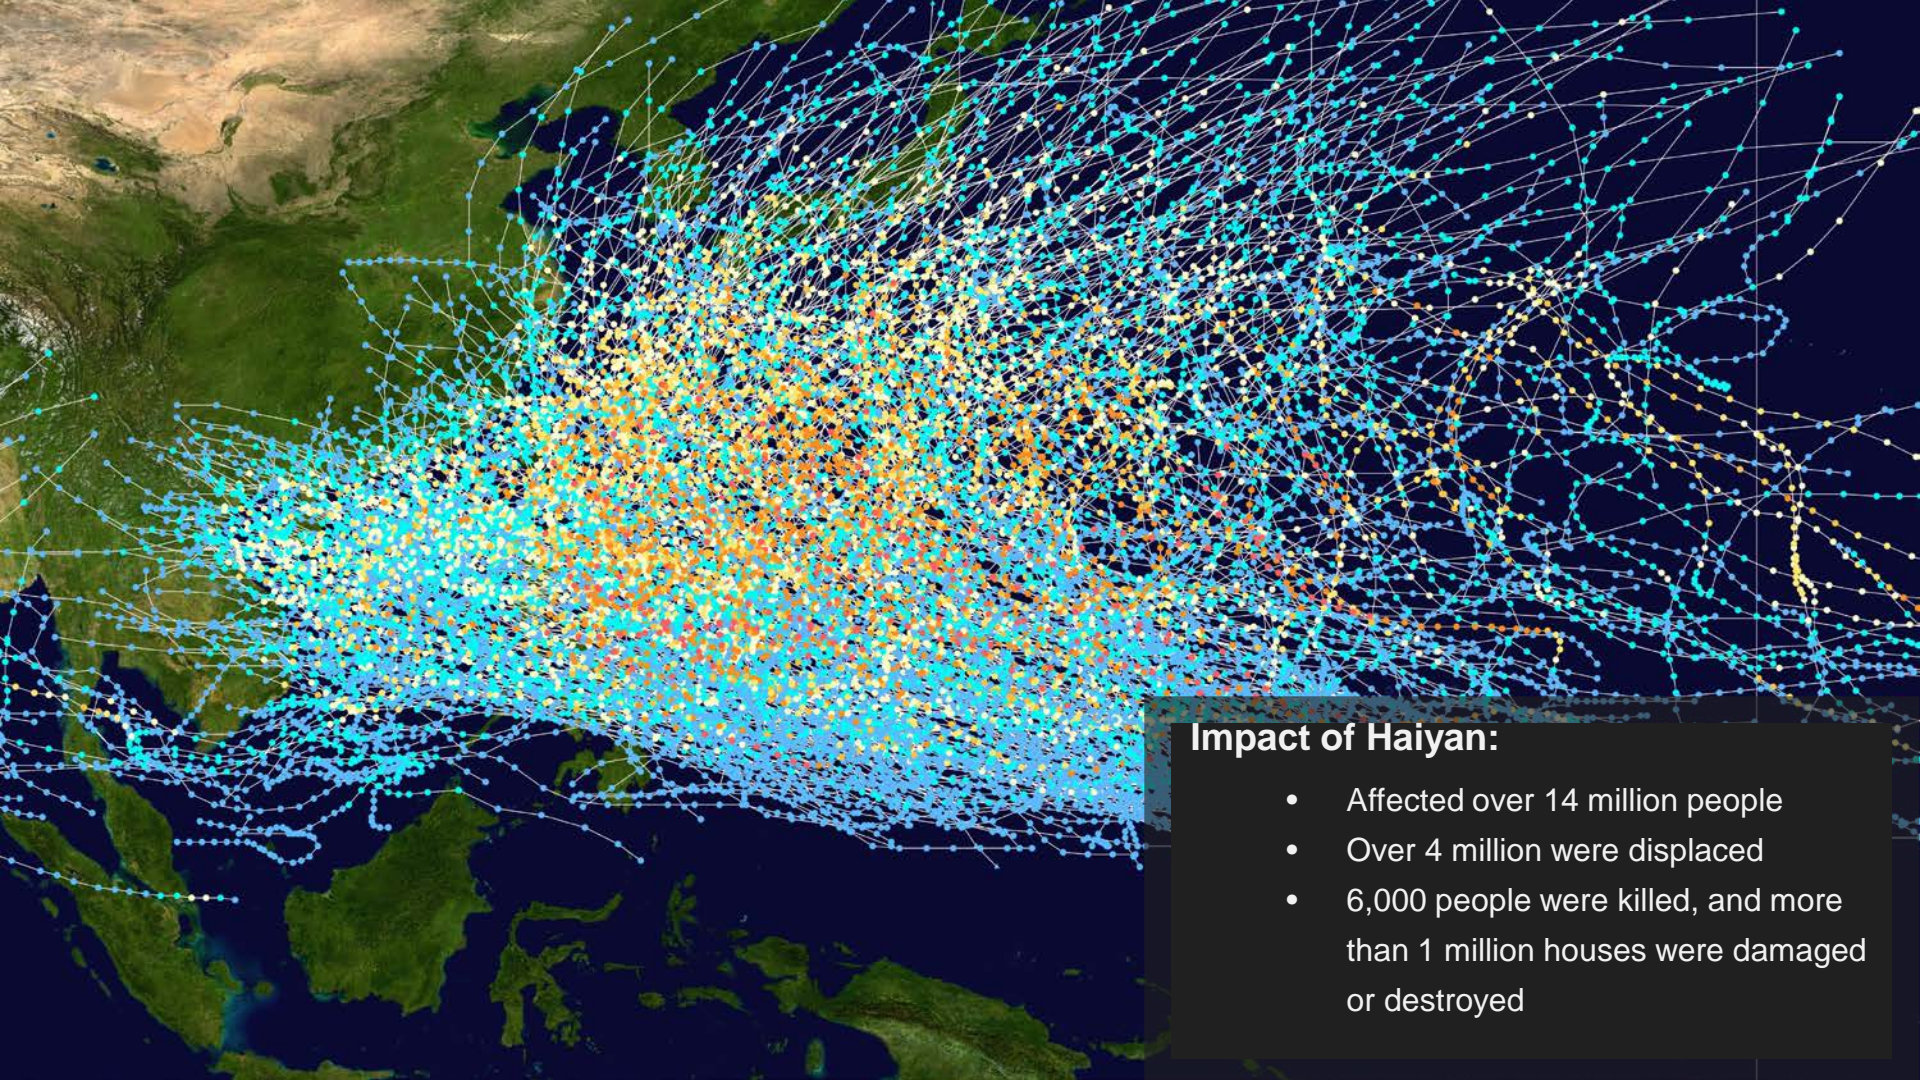

Emma Lovell

Research Fellow, Overseas Development Institute (ODI)

@E_lovell

Promoting safer building project

Impact of Haiyan:

- Affected over 14 million people
- Over 4 million were displaced
- 6,000 people were killed, and more than 1 million houses were damaged or destroyed

WALONG PAALALA PARA MAGING LIGTAS AT MATIBAY ANG ATING TAHANAN

VILL YAGALOG

1. MAGTATAY NG MATIBAY NA PUNDASYON

2. ITALEH SEMILA SA BABA PASTKAS

3. BUKANAY NG BRACE PANGGONTA SA BAYO

Dahil sa pinsalang dinata ng bagyong Yolanda, dapat natin siguruhin na matibay ang ating tahanan. Narito ang walong paalala kung paano at kung sa anong paraan natin itatayo ng maayos ang ating bahay.

PAANO HAKA-APEKTO ANG BAYO SA ATING BAHAY?

4. SIGURUHIN NG MATIBAY ANG PANGKAKABIT

5. HINAY PANGKAKABIT NG BAHAY SA KANALANAN NG MATIBAY NA BAYO

6. MAGING HANDA SA LAHAT NG ORAS

7. PANGKAKABIT NG BAHAY SA PANGKAKABIT NG BAHAY

8. MAGTATAY NG BAHAY SA LISTAS NA LUGAR

Disaster Preparedness

CARE

CARE

Technical assistance

Material assistance

Financial assistance

What can we learn about self-recovery?

- **Prioritise** needs and perspectives of affected households
- **Context matters:** one size does not fit all
- A **holistic and integrated approach** is key
- **Tailored approaches** are needed to support self-recovery

Self-recovery from disasters

An interdisciplinary perspective

John Twigg, Emma Lovell, Holly Schofield, Luisa Miranda Morel, Bill Flinn, Susanne Sargeant, Andrew Finlayson, Tom Dijkstra, Victoria Stephenson, Alejandra Albuern, Tiziana Rossetto and Dina D'Ayala

Key messages

- **Self-recovery:** most disaster-affected families rebuild their homes relying on their own and local resources, with little or no external assistance.
- **Context:** the governmental, economic, environmental and socio-cultural contexts in which self-recovery takes place greatly affect how it progresses. Availability and application of reconstruction grants are influenced by government conditions. Recovery often takes place in multi-hazard environments. Socioeconomic differences and levels of community organisation have an effect on access to, and use of, resources.
- **Drivers and barriers:** many different influences contribute to the overall progression of self-recovery or to progress being held back. Important factors include households' changing needs and priorities, livelihood pressures, psycho-social reactions to disaster, and the level of technical skills and knowledge available.
- **Build back safer:** the process of reconstruction in self-recovery is multi-faceted, involving complex decision-making and priority setting by affected individuals and households. It is also influenced by external resources, support and regulations.
- **Interdisciplinarity:** effective support for self-recovery requires humanitarian and other actors to take an interdisciplinary approach to both design and implementation of interventions.
