Promoting safer building and supporting self-recovery

Emma Lovell
Research Fellow, Overseas Development Institute (ODI)

@E_lovel
Promoting safer building project
Impact of Haiyan:

- Affected over 14 million people
- Over 4 million were displaced
- 6,000 people were killed, and more than 1 million houses were damaged or destroyed
Technical assistance
Material assistance
Financial assistance
What can we learn about self-recovery?

- **Prioritise** needs and perspectives of affected households
- **Context matters**: one size does not fit all
- A **holistic and integrated approach** is key
- **Tailored approaches** are needed to support self-recovery
Thank you for your time!
