

Leaving no one behind

The role of evidence-building and profiling to include displacement in recovering and development processes

|| **Natalia Krynsky Baal,**
Coordinator, Joint IDP Profiling Service

WHAT IS PROFILING?

Defining profiling

A collaborative process for data gathering and analysis of displacement situations

- Demographics, vulnerabilities, capacities...
- Mixed methods approach
- Comparison of displaced and host communities
- Informs operational/strategic decision-making
- Jointly undertaken by government, humanitarian and development actors for agreed upon evidence-base

USES OF PROFILING FOR RECOVERY

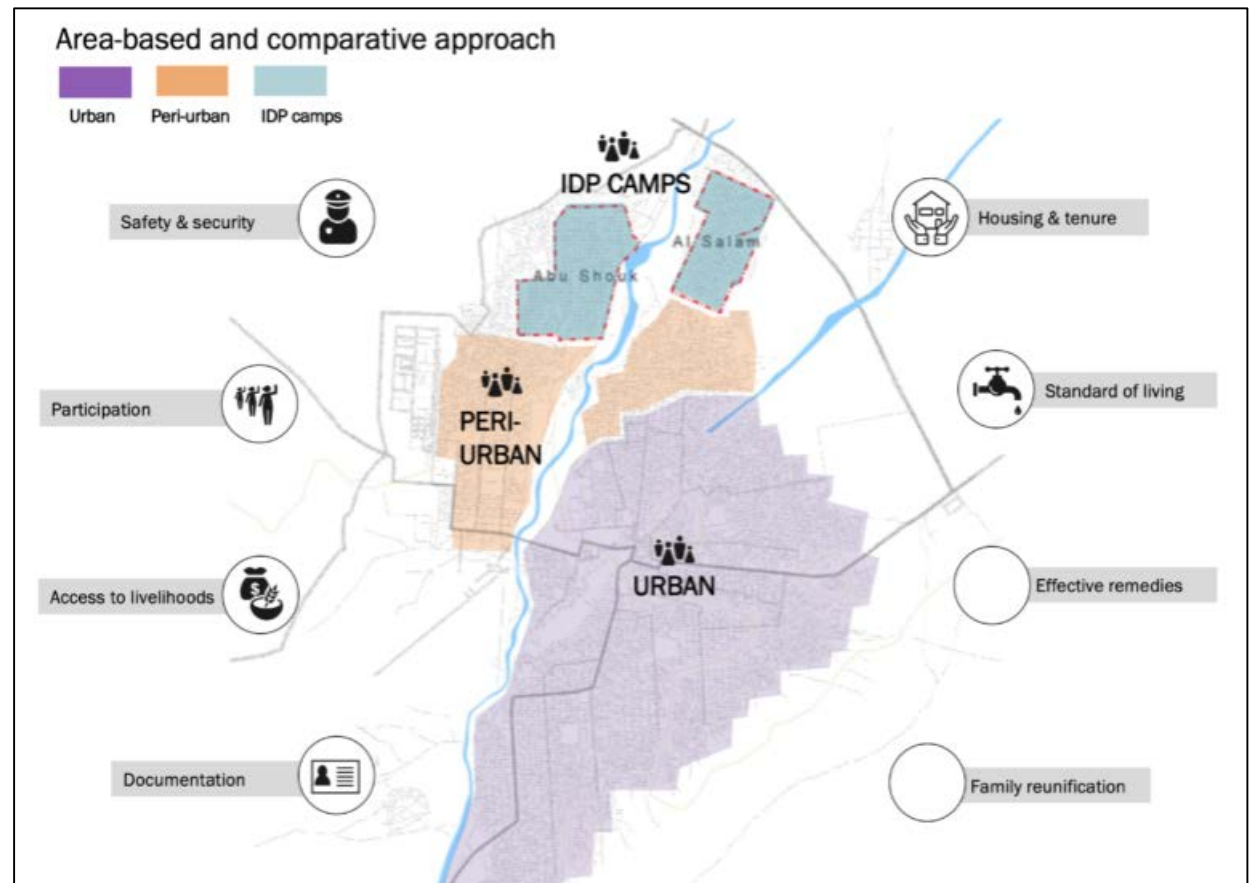

National Development Plan: Mogadishu, Somalia

- Federal (Planning) and Municipal authorities led process alongside hum-dev partners
- Results indicated both humanitarian and development needs through balanced analysis
- Data incorporated in NDP process and Durable Solutions Initiative

Durable Solutions Strategy: El Fasher, Sudan

- Multi-sectoral and area-based analysis across 8 IASC Durable Solutions Criteria
- Collaborative process including central/local authorities, UN, World Bank and NGOs
- Analysis demonstrates need longer-term planning for durable solutions in urban context, incorporated into strategy development

Urban Integration Planning: Thessaloniki, Greece

- Refugees, asylum-seekers and spontaneous arrivals
- Aimed at measuring extent of integration along four dimensions: legal, economic, socio-cultural and political/civic
- Municipality leadership, with humanitarian partners, incorporated results into local planning

KEY RECOMMENDATIONS & INITIATIVES

Joint IDP Profiling Service

- Technical and coordination support to profiling
- Inter-agency service
- Expertise in protracted displacement
- Three strategic goals (durable solutions, urban displacement and capacity building)
- Recognised by GA and HRC resolutions

Recommendations

Lessons from **10 years of profiling support**

- Working with the right partners
- Prioritise collaborative process through neutral coordination as much as quality data
- Link analysis to identified planning process/recovery framework from the start
- Population group comparison is critical
- Analysis of people *and* place adds value
- Community engagement increases validity and usefulness of results

Initiatives

Building **global standards** to facilitate inclusion

- Expert Group on Refugee and IDP Statistics
- Durable Solutions indicator library & guide
- Vulnerable group disaggregation of the SDGs
