

CRP CITY SCAN

CITY RESILIENCE PROGRAM

CRP MECHANISM

Two parallel running tracks: Resilience Enhancing and Capital Mobilization. Each of these tracks has three phases.

Resilience Enhancing

- ✓ CRP City Scan
- ✓ Investment planning workshop

PROJECT SCOPING

PHASE I

IDENTIFICATION

- ✓ Technical Assistance

PROJECT PREPARATION

PHASE II

PREPARATION

- ✓ TA as needed

PROJECT EXECUTION

PHASE III

IMPLEMENTATION

Capital Mobilization

CAPITAL ASSESSMENT

- ✓ Rapid Capital Assessment
- ✓ Financial solutions workshop

CAPITAL INVESTMENT PLANNING

- ✓ Investment sourcing
- ✓ Capital mobilization plan

TRANSACTION EXECUTION

- ✓ Transaction execution
- ✓ Financial Close

Some useful concepts and indicators

Less widely-used

COMPETITIVENESS SCAN

CITY RESILIENCE PROGRAM

City-Level Indicators

- Urban Population
 - Population
 - Population Density
- Urban Economy
 - City Prosperity Index
 - Productivity Index
 - Equity Index, etc.
- Urban Resilience
 - Environmental Sustainability Index
 - Green Space per million inhabitants
- Urban Planning
 - Masterplan
- Urban Services
 - Access to Piped Water, Sanitation, etc.

Sectors and Indicators

- Transportation
 - Housing
 - Solid Waste Management
 - Integrated Water Management
 - Sanitation
 - Health
 - Environment
 - Climate
 - Disaster Resilience
 - Governance
 - Regulations
- [1-3 indicators per sector, see Annex]*

**Full list in Annex*

1

URBAN DIAGNOSTICS MARKET ASSESSMENT

Review of available urban and resilience frameworks

2

KEY SECTORS AND INDICATORS

Distill key sectors and indicators

3

COMPETITIVENESS BENCHMARKING

Comparison with cohort and international standards

Organization	Report / Dataset	Remarks
UN-HABITAT	World Cities Report	Good availability
UN-HABITAT	Urban Data	Poor availability (Africa)
UN Data	data.un.org	Often country-level
World Bank	Doing Business Report	Often country-level

COMPETITIVENESS SCAN

CITY RESILIENCE PROGRAM

1

URBAN DIAGNOSTICS MARKET ASSESSMENT

Review of available urban and resilience frameworks

2

KEY SECTORS AND INDICATORS

Distill key sectors and indicators

3

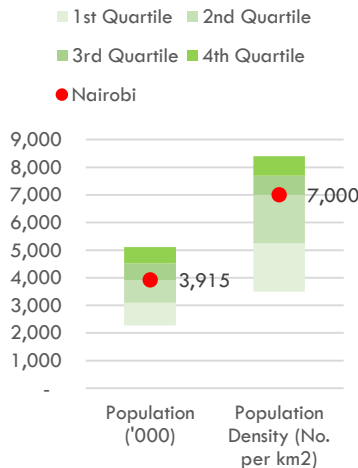

COMPETITIVENESS BENCHMARKING

Comparison with cohort and international standards

- CRP team compiles indicators with available data into 1-2 pager factsheets per city
- Cities benchmarked against cohort of peers and international standards – conversation starter

City-level indicators:

Urban Population

Sectoral indicators:

Land Use

Water and Sanitation

Transport

GEOSPATIAL SCAN

CITY RESILIENCE PROGRAM

- CRP team with support from GOST delivers a package of maps, visualizations and spatial analytics to the city
- Tap on World Bank/GOST's internal and external partners: ESA, DigitalGlobe, etc.

Package Contents (TBC based on cost/time requirements with GOST)

High spatial resolution

- Urban and peri-urban land use/land cover
- Extent and type of informal settlements/slums
- Building footprints
- Street distribution (arterial vs. collector roads), street widths, street and intersection density
- Population distribution and density
- Elevation/building height
- Flood history, flood risk and associated infrastructure exposure

Low spatial resolution

- Urban extent/built-up area
- Urban heat islands
- Night time light data

Supplementary spatial analytics

- Proximity/average distances to commercial, institutional and industrial areas from formal and informal settlements
- Service accessibility measures (e.g. access to piped water/improved drinking water sources, electricity, piped sewer system/improved sanitation facilities, solid waste collection facilities, health facilities, schools, amenities, public transport, etc.)
- Urban density, fragmentation and compactness
- Share of built up/impervious surface
- Analysis of green spaces
- Potential areas/ land parcels ripe for private sector development
- Floor-to-area ratio estimates

SOCIAL NETWORK SCAN

CITY RESILIENCE PROGRAM

"a social network is made up of a number of actors who are connected by some type of relationship. Social network analysis (SNA) is the process of mapping these relationships, and analyzing the structure of the network and the influence of different actors."

International Rescue Committee. "Social Network Analysis Handbook" July 2016

SIMPLIFYING URBAN COMPLEXITIES

- Urban settings are too complicated to assess.
- Simplified tools enable the policymakers to make a clear decision.

MAKING INVISIBLE VISIBLE

- Understanding influence, power, and capabilities increases the probability of effective policymaking.

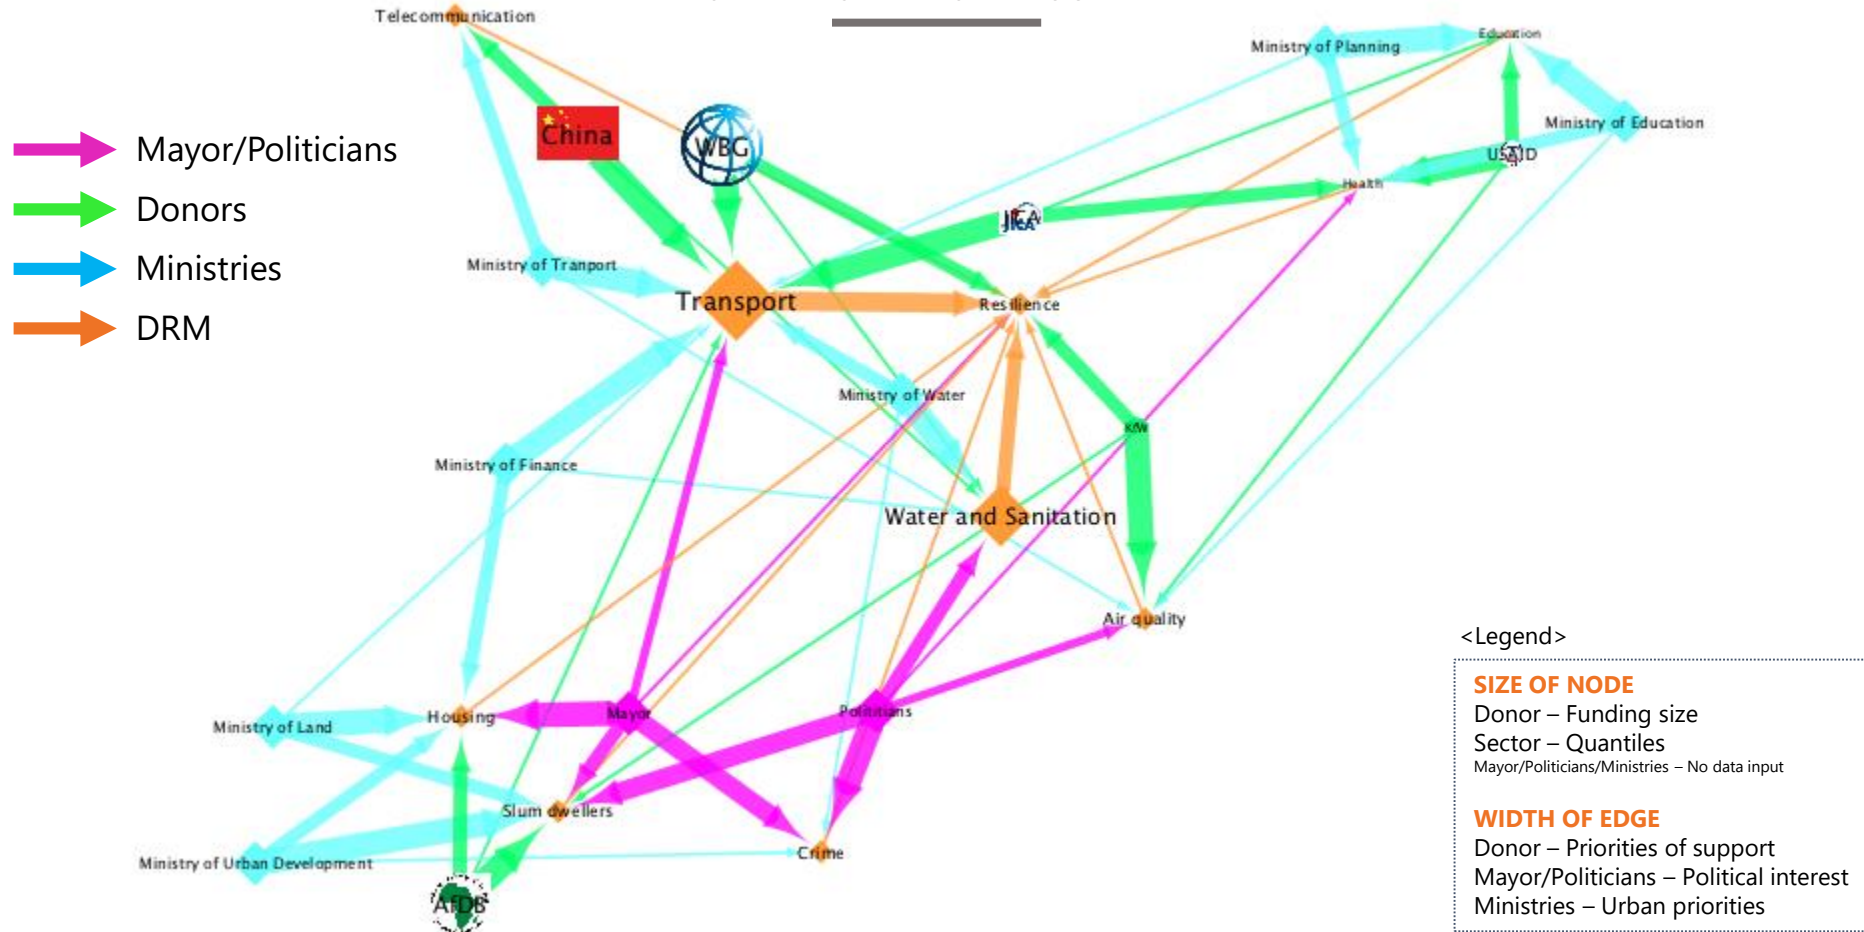

VISUALIZING THE NETWORK

- Social network scan helps to unleash the complex network among policymakers, government, donors, and sectors.

ANNEX: COMPETITIVENESS SCAN INDICATORS

CITY RESILIENCE PROGRAM

City-level indicators:

City-level	Indicators and Units	Data Source	Remarks
Urban Population	Population ('000)	WCR (UN-HABITAT)	
	Population Density (no. per km ²)	Demographia	
	Population Growth Rate (%; 2015-2020)	UN State of the World's Cities	
Urban Economy	Metropolitan Area (km ²)	Demographia	
	City GDP (\$B, PPP)	PwC City GDP Rankings	Lack of data for cities in Africa
	City Prosperity Index (0-1)	UN Urban Data (UN-HABITAT)	
	Equity Index (0-1)	UN Urban Data (UN-HABITAT)	
	Infrastructure Development Index (0-1)	UN Urban Data (UN-HABITAT)	
	Productivity Index (0-1)	UN Urban Data (UN-HABITAT)	
	Quality of Life Index (0-1)	UN Urban Data (UN-HABITAT)	
Urban Resilience	Green Area (Ha. per million people)	WCR (UN-HABITAT)	Lack of data for cities in Africa
	Environmental Sustainability Index (0-1)	UN Urban Data (UN-HABITAT)	
Urban Planning	City has a Masterplan (Y/N, agency responsible)	Desk Review	
Urban Services	Piped water (% of city population)	WCR (UN-HABITAT)	

ANNEX: COMPETITIVENESS SCAN INDICATORS

CITY RESILIENCE PROGRAM

Sectoral indicators:

Sector	Indicators and Units	Data Source	Remarks
Transportation	Share of walking as means of transport in city (%)	UN Urban Data (UN-HABITAT)	
	Paved streets as a share of all streets (%)	UN Urban Data (UN-HABITAT)	
	Street density index (0-1)	UN Urban Data (UN-HABITAT)	
Housing	Slum population (% of city population)	WCR (UN-HABITAT)	
	New housing units required per year (No.)	[Population * Growth Rate] / HH Size	
Solid Waste Management	Connection to sewerage (% of city population)	WCR (UN-HABITAT)	
Integrated Water Management	Improved water access and quality (% of city population)	WCR (UN-HABITAT)	
	Piped water (% of city population)	WCR (UN-HABITAT)	
Sanitation	Improved sanitation access and quality (% of city population)	WCR (UN-HABITAT)	
Health	HIV prevalence among 15-49 year old population (%)	UN Urban Data (UN-HABITAT)	Lack of city-level disaggregation
Environment / Climate	CO2 Emissions per capita (Tons per inhabitant)	WCR (UN-HABITAT)	
Disaster Resilience	Average annual loss of lives by floods / earthquakes / droughts / cyclones	UN Urban Data (UN-HABITAT)	Lack of city-level disaggregation and data for cities in Africa
Governance	Own-Source Revenues (% of city revenues)	TBC	TBC
Regulations	Legally mandated inspections of buildings occur in practice during construction (Y/N)	WB Doing Business Report	Country-level data
