WORLD RECONSTRUCTION CONFERENCE
13TH MAY 2019

INCLUSIVE RESILIENCE

BY

SASJA KAMIL
Topics

My background and inclusion

Learn from Practice: Nepal, Bangladesh, other

Lessons and Recommendations
My background
Cordaid/ Partners for Resilience: mainstream vulnerable groups

Children with disabilities: working on inclusive Disaster Risk Management (DRM)
Who are vulnerable groups for hazards

- People living in hazard prone areas (flood/drought/landslide/earthquake..)
- People from lower casts
- People living in slums
- Indigenous groups
Who are the Marginalized Groups?

- People with disabilities
- Older people
- Women
- Youth
Learn from practice in inclusive DRM:

Bangladesh, Nepal
Bangladesh: 2015
Preparedness floods + cyclones

• Communication materials on inclusive early warning
• Inclusion in DRM committees: Promote + train PWD
• Accessible cyclone shelters
• Inclusive climate resilient livelihood/diversification
Preparedness: Community songs and drama
Lessons Dhaka conference 2015 = Sendai for disability inclusion

Twin track approach + cooperate

- Organisations for Marginalized groups:
  - Promote Inclusive DRM, specialized
- Government/Development/relief organisations:
  - mainstream inclusion
Relief Nepal, 2016 (1 year after earthquake)

- Data collection: who, numbers, where, disability, needs
- Share data
- Referrals to health centres
- Assistive devices
- Train in inclusion
- Access disability cards
- Temporary shelter
Reconstruction Nepal: livelihood
Reconstruction: Accessibility

- Health centres
- Women and children office
- Schools
- Water sources
- Toilets
Learn from practice

Study inclusion in PFR 2019

8 countries

Visions on vulnerable - marginalized

2 have clear attention for inclusion
2 have some attention
4 have insufficient attention
Philippines Coron, after typhoon Haiyan 2018

• All stakeholders including young and old women involved in community DRR mapping and plans: climate proof livelihood
Income generation and protection

- Women weaving baskets from pandan grass
- Villages Savings and Loans associations
- Pandan grass planted as coastal protection
Inclusion in all steps of the Disaster Risk Management cycle

Major lessons and recommendations
Disability organisations:

Working on disaster risk is not a choice, it is our responsibility

But how to?

Others

Inclusion of all marginalized groups needs specific attention!

But how to?
Variety of Approaches

- **Liliane foundation as disability organisation:**
  - Gorkha: only for PWD
  - Rasuwa: PWD + others
  - Bangladesh: PWD

- **Cordaid: as mainstream organisation**
  - Rasuwa: Inclusion in horticulture training in reconstruction phase

- **Cordaid and PFR: as mainstream**
  - Inclusion is part of DRR analysis
  - Inclusion in policies
Inclusion in all steps of the disaster risk management cycle and **Monitor**

- Inclusive DRR analysis and planning
- Inclusive preparedness and evacuation plans and accessible shelters
- Build back better + accessible
- Inclusion in climate/hazard proof livelihood interventions
- Disaggregated data + share
- Assistive devices + specialized assistance
- Inclusive and accessible relief
Cooperation:

WORK TOGETHER, WITH **ALL STAKEHOLDERS**

NEED FOR **COMMITTED STAFF** WHO KNOW HOW TO WORK WITH MARGINALIZED GROUPS
Participation

- Really listen + involve marginalized groups!
Capacity building

- Training in
  - inclusion of “mainstream” organisations
  - DRM of organisations for marginalized groups

- Exchange/learning (visits)

- Joint training

- Inclusion advisor
Many types of impairments, for example Deaf, Blind, Mobility problem, Mentally retarded.
Adjust communication to impairments

Directly

Or via care takers
Many organisations have (training) materials, for example:

- GFDRR 5 actions for disability inclusive DRM
- ADCAP: good practice guide + training
- Helpage
- CBM
- Handicap International
- + + +

USE THIS
Monitor inclusion

For example:

– Early warning signs accessible for all?
– Are DRR plans inclusive?
– Evacuation sites accessible and within reach?
– Accessibility of services for PWD/ elderly/ women
– Availability of provisions and devices needed by PWD/ elderly/ children
– Are houses/ health centres/ schools built back better and accessible after a disaster?
THANK YOU AND LEAVE NO ONE BEHIND
Inclusive Resilience for all
